

# EZ Change Product Codes

## ***Purpose***

Pre-filter your product imports to modify product codes for any/all product\_ids. Simply import a CSV that has 'Product id' and 'Product code' fields using this utility and the codes for the various product\_id's will be changed. You then import normally using the new 'Product code' field

Click the "Addons/Change product codes" menu item to bring up the standard cs-cart file import dialog. Import your CSV. Warnings/errors are displayed in standard dialogs.

When complete, you can then use the standard Administration/Exim/Import to import your products.

## ***File formats***

There are two required columns in the imported CSV:

- Product id
- Product code

All other columns are ignored for this pre-filter.

## ***Customization***

There are no customizations available for this add-on.

## ***Contact Us***

If you have any difficulty you can contact us via one of the following contact points:

- Email – [support@ez-ms.com](mailto:support@ez-ms.com)
- Ticket System – [helpdesk@ez-ms.com](mailto:helpdesk@ez-ms.com)
- Phone – (503) 906-3563

We will do our best to ensure you are satisfied.
