

# Mystery Coupon Addon

## Purpose

This addon allows you pre-configure a coupon to be used when a customer visits your site via an external link. You can configure the addon to behave in many different ways (see below for details). You can configure it for use with a specific product to be added to the cart (sorry, only one) and the user can be taken to the page of your choice, or directly to checkout with the coupon value applied.

## Usage

You can set default behaviors in the addon settings. These settings can also be overridden by the parameters passed in the query string of the link.

| Query Parameter | Addon Setting           | Behavior  |
|-----------------|-------------------------|---|
|                 | Show coupon description | Whether to display the coupon code as the title and the description of the coupon to the customer on the first page shown as a "Client" message box.  |
| d               | Default description     | One of either "short_description" or "long_description" to be used if showing description. Default is short_description.  |
| cc              | Coupon code             | The coupon code to apply.   |
| pc              | Product code            | Add this product to the cart  |
| qty             | Quantity                | When product code is defined, use this quantity when adding to the cart.  |
| u               | Default redirect URL    | The URL to direct to when finished processing. The default is 'index.php'. To take the user directly to checkout after adding to the cart, use 'index.php?dispatch=checkout.checkout'. To take them to a category page, use the name of the page. |
|                 |                         |   |

## Installation

Installation is as automatic as possible. It should be compatible with any 2.x version of the cart.

A download link will be enabled following capture of your payment. You will be emailed with the link to download the archive. Upon receipt of your order we will contact you to verify the Domain Name you submitted with the order and to send you the license key. **This addon is licensed software.** Failure to enter the license key and/or if the key does not match the domain where the addon is being used will cause the addon to

be disabled. Please contact us if you encounter any problems if you feel you've entered the license key correctly and the domain name is accurate. Note: EZ Merchant Solutions customers do not need to enter a license key, it will default to using the cart license key if empty.

### **Installation Steps**

1. After downloading the archive, extract it in the root of your store. This will "load" the addon into the system.
2. Go to Administration->Addons and click "Install" for the **Mystery Coupon** addon. This will install the addon and the needed files.
3. Click the *edit* link beside the **Mystery Coupon** addon and configure the settings you want. Be sure to enter the license key we sent you **exactly**. Then click Save.

This will kick-off the internal installation of the addon.

The installation is now complete. You can test it by entering a valid coupon code and then executing the URL:

`<your_store.com>?dispatch=mystery_coupon`

When you add an item to the cart, the coupon should be applied. If you have entered a product code and changed the URL to `index.php?dispatch=checkout.checkout` then you should be taken directly to the cart with the appropriate product ready for checkout.

### **Customization**

There are no customizations available for this addon.

### **Screen Shots**

The Admin screen shot follows.

### Mystery coupon: options

[General](#) **Configuration**

Show coupon description:

Which description:  Short description  Long description

Default coupon code:

Default product code:
